experience

- | | | |
|-----------|---|-----------------|
| 2009–Now | 577 SOFTWARE MAINTENANCE SQUADRON
<i>Electronics Engineer</i> <ul style="list-style-type: none"> – Technical software lead and subject matter expert in external geographic dataset management and pre- and post-mission data processing tools for the E-8C Joint Surveillance Target Attack Radar System (JSTARS). – Oversee a Scrum team of 8 engineers in the architectural design and development of new and existing software products for JSTARS through direct guidance, mentoring, and process facilitation of team members and by conducting products in an Agile manner through the software development life cycle. – Communicate as an advisor to other technical leads and integrated product team (IPT) leads both in-house and at Northrop Grumman Aerospace Systems in Melbourne, FL, to improve production quality. – Exceed expectations by delivering 100% defect free software products in spite of aggressive delivery schedules and stringent quality measures. – Duties include initiating, directing, and coordinating software studies and modifications, resolving complex requirements, and refining new software techniques. – Design, implement, functionally test, and review several Software Change Requests (SCRs), Activities, and Software Tracking Requests (STRs). | Robins AFB, GA |
| 2018–Now | PENFIELD COLLEGE, MERCER UNIVERSITY
<i>Adjunct Faculty</i> <ul style="list-style-type: none"> – Organize and orchestrate courses in computer programming in a hybrid (traditional and online) format to students pursuing the B.S. degree in Informatics in the Department of Mathematics, Science, and Informatics. – Duties include preparing, administering, and grading course assignments and testing materials, planning and conducting lectures, and facilitating student learning and understanding through direct assistance. | Macon, GA |
| 2013–2014 | DEPARTMENT OF ELECTRICAL AND COMPUTER ENGINEERING, GEORGIA TECH
<i>Teaching Assistant</i> <ul style="list-style-type: none"> – Provided guidance and assistance for approximately 20 undergraduate students per semester to improve the formatting and appearance of resumes, technical documents, and presentations. | Atlanta, GA |
| 2009 | DEPARTMENT OF CHEMICAL ENGINEERING, GEORGIA TECH
<i>Computer Assistant</i> <ul style="list-style-type: none"> – Provided computer support to faculty, staff, and students by granting building access, resetting account passwords, replacing printer paper and ink cartridges, and installing software. – Coordinated with Dell Support to request replacement computer hardware, installed the components when they arrived, and shipped the nonoperational components to the manufacturer. – Aided user account migration from one server network to another by editing users' security permissions, adding computers to the network, and adding network printers to a server. | Atlanta, GA |
| 2008 | DEPARTMENT OF BIOMEDICAL ENGINEERING, GEORGIA TECH
<i>Teaching Assistant</i> <ul style="list-style-type: none"> – Facilitated and evaluated assessments for over 70 students in a Biotransport class. | Atlanta, GA |
| 2007–2008 | SOUTH CENTRAL POOLS
<i>Assistant to Operations Manager</i> <ul style="list-style-type: none"> – Performed day-to-day operations including, but not limited to, shipping and receiving of UPS and freight line shipments, inventory control, and order processing. | Forest Park, GA |

education

- 2013–2017 **Ph.D.** in Electrical and Computer Engineering [3.80/4.00] Georgia Institute of Technology
Research Advisor: Dr. George F. Riley
Thesis: Validation of Scalable Software-Defined Network Simulations Using Simulation-Based Routing Applications
- 2010–2012 **M.S.E.** in Software Engineering [4.00/4.00] Mercer University
Minor in Engineering Management
- 2005–2009 **B.S.** in Biomedical Engineering [3.76/4.00] Georgia Institute of Technology
Summa Cum Laude

publications

- DEC 2017 **Simulating Networks with NS-3 and Enhancing Realism with DCE** Las Vegas, NV, US
J. S. Ivey, B. P. Swenson, and G. F. Riley, In Proceedings of the Winter Simulation Conference 2017
- DEC 2017 **Scalability Comparison of SDN Control Plane Architectures Based on Simulations** San Diego, CA, US
H. Yang, **J. Ivey**, and G. F. Riley, In 2017 IEEE 36th International Performance Computing and Communications Conference (IPCCC)
- OCT 2017 **Advancing Software-Defined Networks: A Survey** Online
J. Cox, J. Chung, S. Donovan, **J. Ivey**, R. Clark, G. Riley, and H. Owen, In IEEE Access, vol. 5, pp. 25487-25526.
- SEP 2016 **Designing and enabling simulation of real-world GPU network applications with ns-3 and DCE** London, UK
J. S. Ivey, G. F. Riley, B. P. Swenson and M. L. Loper, In 2016 IEEE 24th International Symposium on Modeling, Analysis and Simulation of Computer and Telecommunication Systems (MASCOTS)
- JUN 2016 **Analysis of programming language overhead in DCE** Seattle, WA, US
J. S. Ivey and G. F. Riley, In Proceedings of the Workshop on ns-3 (WNS3 '16)
- MAY 2016 **Comparing a scalable SDN simulation framework built on ns-3 and DCE with existing SDN simulators and emulators** Banff, AB, CA
J. S. Ivey, H. Yang, C. Zhang, and G. F. Riley, In Proceedings of the 2016 annual ACM Conference on SIGSIM Principles of Advanced Discrete Simulation (SIGSIM-PADS '16)
- MAY 2015 **Phold performance of conservative synchronization methods for distributed simulation in ns-3** Barcelona, ES
J. S. Ivey, B. P. Swenson, and G. F. Riley, In Proceedings of the 2015 Workshop on ns-3 (WNS3 '15)
- DEC 2014 **Performance of conservative synchronization methods for complex interconnected campus networks in ns-3** Savannah, GA, US
B. P. Swenson, **J. S. Ivey**, and G. F. Riley, In Proceedings of the Winter Simulation Conference 2014
- MAY 2014 **Phold performance for distributed network simulation under conservative synchronization methods in ns-3** Denver, CO, US
J. S. Ivey, G. F. Riley, and B. P. Swenson, In Proceedings of the 2nd ACM SIGSIM Conference on Principles of Advanced Discrete Simulation (SIGSIM PADS '14)

certifications

2015	Systems Planning, Research, Development and Engineering Engineering Levels 1 and 2	Defense Acquisition University
2012	Systems Planning, Research, Development and Engineering Science and Technology Manager Levels 1 and 2	Defense Acquisition University
2011	Systems Planning, Research, Development and Engineering Program Systems Engineer Level 1	Defense Acquisition University
2011	Program Management Level 1	Defense Acquisition University
2010	Software Professional Development Program Software Development track	Air Force Institute of Technology

awards

11 SEP 2015	Notable Achievement Award Completely overhauled JSTARS design for importing and interfacing with DAFIF data utilizing a SQL-based implementation over the previous XML-based version, enabling access to DAFIF information for the entire world rather than a small subset inside of a defined mission center. As a result of these software changes, JSTARS operators will have the ability to rapidly and accurately locate airfields for tracking or emergency diversion of aircraft as well as to view possible routes for airborne re-planning.	577 Software Maintenance Squadron
27 AUG 2012	Notable Achievement Award Automated a number of operations in the ancillary JSTARS disk replication application. The implemented enhancements provided the users with extremely useful disk replication functionalities that greatly reduced the time required to build mission kits and eliminated the need for operators to use native OS commands.	577 Software Maintenance Squadron
19 MAR 2012	Time-Off Award Provided list sorting capability to several JSTARS tabular displays (TDs) and extended the list updating functionality for each of these commonly used TDs. The users can now sort entities contained in each TD based on the select field, reducing time and effort in navigating and selecting entities and allowing the warfighter more accurate situational awareness of the battlefield.	577 Software Maintenance Squadron
28 JUL 2011	Notable Achievement Award Provided expertise to generate and complete several projects; demonstrated outstanding coordination with Northrop Grumman in completing said projects and became subject matter expert of the JSTARS disk replication application. These efforts ensured the flight would exceed its annual expected software changes for the year.	577 Software Maintenance Squadron
FEB 2010	Employee of the Month Delivered the highest number of STRs for the month of February (30% of total 30+ member team production) and engaged in thorough and timely technical reviews of software changes. Assisted the customer in defining clear requirements for an SCR, maintained the workload following several technical discussions with the primary Northrop Grumman subject matter expert, and received an invitation to go TDY to demonstrate technical proficiency. Subsequently delivered 4 complex changes in 2 short TDY weeks, impressing the subject matter expert and inheriting all future workload in that area.	577 Software Maintenance Squadron

training

2011	DEF 1013P FalconView Advanced Users	Georgia Tech Research Institute
2011	DEF 1012P Introduction to FalconView Basic Operations	Georgia Tech Research Institute
2010	HE634S HP OpenVMS v8.3 Programming Features	PARSEC Group

biography highlights

APR 2016	First son Knowles Steven Ivey born at Coliseum Medical Center in Macon, GA
MAR 2011	Married Sloane Oldham Ivey in Orange Beach, AL
FEB 2011	Purchased first home in Lizella, GA
MAY 2005	Graduated from First Presbyterian Day School in Macon, GA
NOV 1986	Born at Houston County Medical Center in Warner Robins, GA
